## Recommendation

Amendments required before acceptance

### CONFIDENTIAL COMMENTS TO THE EDITOR(S)

The article addresses an important question: how to make physics laboratory exercises better, meaning, more useful and less boring for students.

the authors' approach can be adopted by other institutions.

Recommendations:1. Address in the abstract if laboratorials also improve student understanding ()page 1, line24)

2. present a chart (table) which would compare different features of traditional labs and labolatorials

### COMMENTS TO THE AUTHOR(S)

The article addresses an important question: how to make physics laboratory exercises better, meaning, more useful and less boring for students.

the authors' approach can be adopted by other institutions.

Recommendations:1. Address in the abstract if laboratorials also improve student understanding ()page 1, line24)

## Regular Report

### GUIDE TO REFEREE

Papers published in European Journal of Physics should provide original insights and enhance the learning and teaching of physics at university level, either undergraduate or graduate. Articles that only incrementally add to previously published work will not, in general, be acceptable.

### QUALITY ASSESSMENT

Please score on a 1-10 basis (1 = low, 10 = high) how you rate this article on the following aspects:

req Originality 8

req Scientific Rigour 6

req Significance 9

### QUESTIONS

What impact will this article have in the field?

Has the author made reference to the most recent and most appropriate work?  
(If no, please provide references in the Comments to the author(s) section.)

Yes

Is the article well written and the work clearly communicated?  
(Please note we will edit upon acceptance and correct any grammatical or typographical errors.)

Yes

High

How relevant is this article for physics teaching, either theoretical or practical?

Please indicate the level of readership of the article.

Graduate

Can this article be shortened without detriment to the content?  
(If yes, please give details in the Comments to the author(s) section.)

No

req Do you want to get credit for reviewing this manuscript on [Publons](#)?

By selecting "Yes" you are opting in to the Publons service and data about this review will be transferred to Publons. By default, the content of the review will not be publicly displayed, and only the year of the review and the journal title will be shown on reviewer profiles. You may edit what is displayed for any review or opt out of the service at any time.

Yes

Thank you for reviewing this article for European Journal of Physics.

This article should be treated as CONFIDENTIAL and the information contained therein should not be cited until the article is published. The report should not be communicated directly to the author.
